

# WELCOME TO LEC2

## TECH WEBS

sponsored by

## FREE of charge training sessions from July 19th to 23rd

LEC2 in close cooperation with Future Electronics is conducting a series of advanced technical trainings targeted to existing or future Lattice FPGA users.

### Course Objective:

LEC2's training and education program is intended to cover the entire Lattice FPGA product range, software tools, design techniques and best practices. Our webinars are characterized by detailed technical content (not a Marketing format) where we present exactly the content that a Lattice FPGA developer needs in his design work.

### The series of TechWebs are planned to cover the following subjects:

- FPGA Architectures
- FPGA Design Technology
- Lattice Software Design Suite
- Timing Constraints
- Implementation and Programming
- HDL for Synthesis
- HDL for Simulation
- Debugging Techniques

### Overview - July 19th to 23rd

Each Webinar is conducted twice in two different timeslots.

### About LEC2

LEC2 offers a variety of free and paid comprehensive technical training courses for engineers and technicians. Different training formats are available: on customer site, face-to-face, live & recorded webinars, shorties, custom training sessions based on customer needs (check [LEC2 training portfolio](#)).

LEC2 partner with Future Electronics to offer a series of free, comprehensive technical webinar program that is held at regular intervals.
